

The Dark Side Of The Web

The internet can be ever so great,
But can also lead to a great debate.

Tell an adult if you get on the bad side of the web,
Do it right away and before going to bed.

The information you read may not always be true,
Maybe one day, it could be about you!

Remember to update your antivirus software,
If you forget, a virus may suddenly be there.

Don't share your password, keep it quiet,
This way you're more likely to avoid a riot.

If you are playing an online game,
Don't give your details, just a first name.

😊 Super poetic advice Phoebe; well done!
