Otterham Primary School

DT Progressio	on of skills KS1
 Designing - Understanding contexts, users and purposes work confidently within a range of contexts, such as imaginary, storybased, home, school, gardens, playgrounds, local community, industry and the wider environment state what products they are making say whether their products are for themselves or other users describe what their products are for say how their products will work say how they will make their products suitable for their intended users use simple design criteria to help develop their ideas Designing – Generating, developing, modelling and communicating ideas generate ideas by drawing on their own experiences use knowledge of existing products to help come up with ideas develop and communicate ideas by talking and drawing model ideas by exploring materials, components and construction kits and by making templates and mockups use ICT, where appropriate, to develop and communicate their ideas 	 Making - Planning M1 plan by suggesting what to do next select from a range of tools and equipment, explaining their choices select from a range of materials and components according to their characteristics Making – Practical skills and techniques follow procedures for safety and hygiene use a range of materials and components, including construction materials and kits, textiles, food ingredients and mechanical components measure, mark out, cut and shape materials and components assemble, join and combine materials and components use finishing techniques, including those from art and design Technical knowledge – Making products work about the simple working characteristics of materials and components about the simple working characteristics of materials and components about the movement of simple mechanisms such as levers, sliders, wheels and axles how freestanding structures can be made stronger, stiffer and more stable that a 3-D textiles product can be assembled from two identical fabric shape that food ingredients should be combined according to their sensory characteristics the correct technical vocabulary for the projects they are undertaking
 Evaluating – Own ideas and products talk about their design ideas and what they are making make simple judgements about their products and ideas against design criteria suggest how their products could be improved Evaluating - Existing products explore what products are and who or what they are for explore how products work and how or where they might be used explore what materials products are made from explore what they like and dislike about products 	 Cooking and nutrition – Where food comes from ✓ that all food comes from plants or animals ✓ that food has to be farmed, grown elsewhere (e.g. home) or caught Cooking and nutrition – Food preparation, cooking and nutrition ✓ how to name and sort foods into the five groups in The Eatwell Plate ✓ that everyone should eat at least five portions of fruit and vegetables every day ✓ how to prepare simple dishes safely and hygienically, without using a heat source ✓ how to use techniques such as cutting, peeling and grating

Otterham Primary School

Evaluating – Own ideas and products	Cooking and nutrition – Where food comes from
 identify the strengths and areas for development in their ideas and products 	✓ that food is grown (such as tomatoes, wheat and potatoes), reared (such as
 consider the views of others, including intended users, to improve their work 	pigs, chickens and cattle) and caught (such as fish) in the UK, Europe and the
 refer to their design criteria as they design and make 	wider world
 use their design criteria to evaluate their completed products 	
	Cooking and nutrition – Food preparation, cooking and nutrition
Evaluating – Existing products Pupils will be taught to investigate and analyse:	 how to prepare and cook a variety of predominantly savoury dishes safely and
 how well products have been designed and made 	hygienically including, where appropriate, the use of a heat source
 why materials have been chosen 	 how to use a range of techniques such as peeling, chopping, slicing, grating,
 what methods of construction have been used 	mixing, spreading, kneading and baking
 developed ground-breaking products 	 that a healthy diet is made up from a variety and balance of different food and
 how well products work to achieve their purposes 	drink, as depicted in The Eatwell Plate
 how well products meet user needs and wants 	✓ that to be active and healthy, food and drink are needed to provide energy for
 who designed and made the products 	the body
 where and when products were designed and made 	
 whether products can be recycled or reused 	
Evaluating – Key events and individuals	
✓ about inventors, designers, engineers, chefs and manufacturers who have	

Otterham Primary School

DT Progression of skills Upper KS2	
 Designing – Understanding contexts, users and purposes ✓ work confidently within a range of contexts, such as the home, school, leisure, culture, enterprise, industry and the wider environment ✓ describe the purpose of their products ✓ indicate the design features of their products that will appeal to intended users ✓ explain how particular parts of their products work ✓ carry out research, using surveys, interviews, questionnaires and web-based resources ✓ identify the needs, wants, preferences and values of particular individuals and groups ✓ develop a simple design specification to guide their thinking Designing - Generating, developing, modelling and communicating ideas ✓ share and clarify ideas through discussion ✓ model their ideas using prototypes and pattern pieces 	 f skills Upper KS2 Making - Planning select tools and equipment suitable for the task explain their choice of tools and equipment in relation to the skills and techniques they will be using select materials and components suitable for the task explain their choice of materials and components according to functional properties and aesthetic qualities produce appropriate lists of tools, equipment and materials that they need formulate step-by-step plans as a guide to making Making – Practical skills and techniques follow procedures for safety and hygiene use a wider range of materials and components than KS1, including construction materials and kits, textiles, food ingredients, mechanical components and electrical components
 use annotated sketches, cross-sectional drawings and exploded diagrams to develop and communicate their ideas use computer-aided design to develop and communicate their ideas generate realistic ideas, focusing on the needs of the user make design decisions that take account of the availability of resources 	 accurately measure, mark out, cut and shape materials and components accurately assemble, join and combine materials and components accurately apply a range of finishing techniques, including those from art and design use techniques that involve a number of steps demonstrate resourcefulness when tackling practical problems Technical knowledge – Making products work how to use learning from science and maths to help design and make products that work that materials have both functional properties and aesthetic qualities that materials can be combined and mixed to create more useful characteristics
	 that mechanical and electrical systems have an input, process and output the correct technical vocabulary for the projects they are undertaking how mechanical systems such as cams or pulleys or gears create movement how more complex electrical circuits and components can be used to create functional products how to program a computer to monitor changes in the environment and control their products how to reinforce and strengthen a 3D framework that a 3D textiles product can be made from a combination of fabric shapes that a recipe can be adapted by adding or substituting one or more ingredients

Evaluating – Own ideas and products	Cooking and nutrition – Where food comes from
 identify the strengths and areas for development in their ideas and products consider the views of others, including intended users, to improve their work critically evaluate the quality of the design, manufacture and fitness for purpose of their products as they design and make evaluate their ideas and products against their original design specification 	 ✓ that food is grown (such as tomatoes, wheat and potatoes), reared (such as pigs, chickens and cattle) and caught (such as fish) in the UK, Europe and the wider world ✓ that seasons may affect the food available ✓ how food is processed into ingredients that can be eaten or used in cooking
 Evaluating – Existing products Pupils will be taught to investigate and analyse: how well products have been designed and made why materials have been chosen what methods of construction have been used how well products work to achieve their purposes how well products meet user needs and wants how much products cost to make how innovative products are how sustainable the materials in products are what impact products have beyond their intended purpose Evaluating – Key events and individuals about inventors, designers, engineers, chefs and manufacturers who have developed ground-breaking products 	 Cooking and nutrition – Food preparation, cooking and nutrition ✓ how to prepare and cook a variety of predominantly savoury dishes safely and hygienically including, where appropriate, the use of a heat source ✓ how to use a range of techniques such as peeling, chopping, slicing, grating, mixing, spreading, kneading and baking ✓ that recipes can be adapted to change the appearance, taste, texture and aroma ✓ that different food and drink contain different substances – nutrients, water and fibre – that are needed for health
